

WHEN YOU'RE AT A CROSSROADS, YOU CAN'T IGNORE THE SIGNS

Is the lack of integrated enterprise imaging management costing your system lost efficiency and reduced patient safety?

With the proliferation of medical devices, up to 80% of healthcare system data is visual versus textual. Ignoring the fact that the majority of this data may be fragmented and not available enterprise-wide, plainly, adds risk to a health system.

Having the right enterprise imaging strategy is critical for proper capturing, sharing, and normalizing of imaging data so it can be utilized for predictive analytics and quality patient care. Without the right strategy, fragmented information leads to fragmented care, delaying team collaboration and quality treatment.

We purpose-built our integrated data platform to help health systems aggressively pursue quality improvement and cost reduction. Talk with AGFA HealthCare to solve your operational and governance challenges with a proven platform to ensure constant monitoring, hardened security, and simplified upgrading – deployed in modular services to fit your organization's strategic plan. We can help you read the signs and build the right care efficiency plan for your system.
