

plastic surgery procedures has been flooded by the entry of non-plastic surgeons practicing procedures outside of their scope of board certification for financial gain. Dentists, family practice doctors, obstetricians and other doctors and non-doctors have chosen to take a weekend course or watch a demonstration video, even purchase equipment and take training from a device representative to then begin charging at reduced fees to offer these procedures. Having treated numerous patients with serious complications suffered at the hands of these unqualified individuals, caution is advised to the reader to seek a plastic surgeon that is Board Certified by the American Board of Plastic Surgery or corresponding International Board. Often, flashy advertising or misleading credentials such as Board Certification by the American Board of Cosmetic Surgery (which is not a Medical Board), confuses patients into a false sense of security. Any agency legally can create a title beginning with the word Board but not be an official Medical Board. Examined the results of the actual surgeon since variation in surgical skill and quality of training exist. Safety, effective results and ethical plastic surgery is of utmost concern at my practice. Consultations are taken

from all over the world, whether in person, by Skype or FaceTime video-conference.
