

Lumen21 and Microsoft offer the only joint public cloud plus service provider offering that is HITRUST-vetted.

HITRUST-VETTED COMPLIANT CLOUD ENVIRONMENT FOR HEALTHCARE APPLICATION WORKLOADS

Lumen21's Compliant Cloud Computing Platform leverages Azure's platform HITRUST certification, adds to it a client-facing HITRUST certified environment for client workloads. A complete HITRUST environment that Simplifies Compliance.

- ✓ Validated for HIPAA Compliance
- ✓ Load and go
- ✓ Managed for continued compliance

COMMUNICATE AND COLLABORATE SECURELY USING OFFICE365

Office 365+ RAP proactively assesses your environment to identify the security and compliance areas mandated by regulations that should be addressed.

- ✓ Results mapped against the HIPAA regulations for compliance
- ✓ GAP Analysis of your current Office365 configuration
- ✓ Gaps ranked as High, Medium and Low
- ✓ Remediation recommendations
- ✓ Results for input into the company's annual risk assessment

BEING COMPLIANT DOES NOT ALWAYS MEAN YOUR ENVIRONMENT IS SECURE

Risk-based approach to define and implement compliance solutions that support a robust security and governance program for your organization.

Cloud Compliance and Security

- ✓ Cloud readiness assessment
- ✓ Defining security roles, responsibilities, processes, and service levels for a cloud environment
- ✓ Developing metrics for measurement and continuous monitoring

Information Security Program Development

- ✓ Assessing current security practices
- ✓ Developing a strategic security plan
- ✓ Building risk management, incident management, vendor management, and privacy programs
- ✓ Policy development and standards mapping

We have you covered on the full spectrum of Compliance, Security, and Cloud; whether it is your own workloads or a PaaS or SaaS environment, if it involves compliance and IT, who else but Lumen21?
